

ACME METAL SPINNING

QUALITY DRIVEN, FOREVER SPINNING

Metal Spinings For Commercial & Architecture Lighting

Acme Metal Spinning has capabilities to produce light fixture components up to 140 inches in diameter. Examples include chandelier rings, light fixture bowl, hemispherical bowls, reflectors and many more shapes.

Our experience includes producing lighting components for commercial and governmental buildings, theaters, churches, libraries and more. Often large, one-of-a-kind and low quantity decorative lighting fixture designs pose fabricating challenges in terms of turnaround time, quality and economy. Acme Metal Spinning's is your solution for and our time-proven, cost effective processes for producing impressive appearing parts in low to medium quantities and with short lead times.

Examples include:

Light reflectors	Chandelier rings	Lighting canopies
Hemispheres	Lighting bowls	Lamp fitters
Reflectors	Pendant rings	Lamp cups
Globe Bases	Lighting discs	Lamp covers
Optical reflectors	Lighting amp finials	Lamp caps
Recessed trims	Lighting spacers	Lamp breaks
Lighting cylinders	Lighting Balls	Lamp bodies
Lighting rings	Lighting domes	Lamp bases
Lighting fitters	Lighting cupolas	Lamp inserts
